

Ahmed Hamada

Front-End Developer

Giza, Egypt | +20 1027727421 | [E-mail](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Front-End Developer with expertise in the Next.js ecosystem and TypeScript, focused on building feature-rich, data-driven applications. Built a comprehensive tourism discovery platform featuring dynamic routing for 50+ destinations, real-time caching with React Query (reducing API calls by 60%), and interactive Google Maps integration. Background in customer service provides a unique advantage in understanding user pain points and translating them into seamless, intuitive interfaces. Passionate about writing maintainable, scalable code and delivering exceptional user experiences.

Experience

Customer Service Representative | Concentrix – 6th of October City, Egypt | 07/2024 – 11/2025

- Delivered customer support in fast-paced environments, resolving issues efficiently
- Developed strong communication and problem-solving skills.

Customer Service Representative | Teleperformance – Giza, Egypt | 04/2023 – 03/2024

- Resolved 80+ customer technical inquiries daily, maintaining 95% satisfaction.
- Built strong client relationships and improved satisfaction scores.

Front-End developer | Springer Capital– US & Canada (Remote) | 05/2026 – *present*

- Next.js Specific: SSR (Server-Side Rendering), SSG (Static Site Generation), ISR (Incremental Static Regeneration), App Router, Server Components, Middleware.
- React Specific: Hooks (useState, useEffect, useMemo), Custom Hooks, Context API, State Management (Redux/Zustand), Virtual DOM optimization.
- Performance: Lighthouse scores, Core Web Vitals (LCP, FID, CLS), Code Splitting, Image Optimization.
- DX (Developer Experience): TypeScript, ESLint, Prettier, CI/CD pipelines.

Training & Certifications

Front-End Scholarship (React.js) | Route – Giza, Egypt | 08/2024 – 10/2025

- Completed intensive training in React.js and modern front-end development.
- Built responsive web applications with focus on usability and performance.

Education

Bachelor of Science in Information Technology | Egyptian E-Learning University (EELU) | 2020 – 2024

Skills

- **Languages & Frameworks:** HTML, CSS, JavaScript, React.js, TypeScript, SASS, Node.js
- **Tools & Soft Skills:** Git, GitHub, Problem-solving, Customer Relations, Communication

Projects

Home-Book-Edu – Remote Learning Platform

- Developed using **Node.js and TypeScript**.
- Designed responsive UI for remote learners.
- Implemented modular components for scalability.

LOS REYES – Website for tourism in Egypt

- **Built a full-stack tourism web application** showcasing Egypt's top destinations and activities, designed to help travelers plan their trips seamlessly.
- **Architected the site using Next.js App Router** with dynamic routing (`/destination/[slug]`) for 50+ destination pages, achieving 100/100 SEO scores on Lighthouse through SSG and metadata optimization.
- **Engineered a powerful filtering system** (by region, category, price range) using React Query for caching, reducing API calls by 60% and providing instant UI updates.
- **Implemented Incremental Static Regeneration (ISR)** to update destination availability daily, ensuring users always see accurate pricing without full rebuilds.
- **Integrated Google Maps API** with custom markers for each destination, allowing users to visualize activities across Cairo, Luxor, Aswan, and the Red Sea.
- **Optimized image delivery using Next.js `<Image>`** component with responsive breakpoints, reducing Largest Contentful Paint (LCP) from 3.8s to 1.2s.
- **Built a fully responsive UI** with Tailwind CSS and Framer Motion animations, enhancing mobile user engagement by 35% (based on analytics).
