

AHMED HAMADA

Full-Stack Developer

Giza, Egypt | ah.hamada1899@gmail.com | +20 1027727421

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer building production web applications with React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, and Drizzle ORM. Delivered bilingual Arabic/English (RTL/LTR) platforms, CRM and HR dashboards, and full-stack e-commerce, including an OAuth 2.0 / OIDC single sign-on (SSO) ecosystem across five internal systems. Implements REST APIs, authentication, permission-based RBAC, relational database models, automated testing, and Docker-based CI/CD deployments, focused on responsive, accessible, high-performance interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, SQL

Front-End: React.js, Next.js (App Router), Vite, Redux, Zustand, Context API, TanStack Query, React Hook Form, Zod, Tailwind CSS, Radix UI, shadcn/ui, Recharts, Framer Motion, GSAP

Back-End: Node.js, Express.js, Next.js Route Handlers, RESTful APIs, OAuth 2.0 / OpenID Connect (OIDC), PKCE, RS256 token signing, JSON Web Tokens (JWT), bcrypt, Swagger / OpenAPI

Databases and Caching: PostgreSQL, Prisma ORM, Drizzle ORM, Redis, relational database design, schema migrations, database transactions

Testing and Quality: Vitest, Playwright, unit / API / end-to-end (E2E) testing, ESLint, Prettier, Storybook

DevOps and Tooling: Git, GitHub, CI/CD, Docker, Docker Compose, nginx, Coolify, Vercel, Turborepo, Jira, Agile/Scrum

Security and Practices: Helmet, rate limiting, Pino logging, server-side rendering (SSR), SSG, ISR, React Server Components, code splitting, Lighthouse, Core Web Vitals, role-based access control (RBAC), internationalization (i18n), Arabic RTL

Integrations and Reporting: Zoho CRM, Google Sheets API, Resend, React Email, Moyasar payments, ExcelJS, SheetJS

PROFESSIONAL EXPERIENCE

Full-Stack Developer | May 2026 - Present

Ellwaa Software | Giza, Egypt | Hybrid

- Develop bilingual (Arabic/English, RTL/LTR) Next.js websites for ellwaa.com covering industries, careers, insights, blogs, and contact flows with next-intl and Tailwind CSS, inside a Turborepo monorepo spanning website, Assis app, dashboard, and Node.js backend packages.
- Designed single sign-on across five internal systems (HR, sales CRM, ticketing, LOHO, account-manager) on an OAuth 2.0 / OIDC identity provider: a launcher issuing one-time authorization codes exchanged server-to-server for RS256-signed tokens, PKCE, code replay rejection, dual acceptance of local and central IdP tokens on every satellite API, per-user system assignment, and role re-sync from IdP claims - verified by 27/27 launcher checks and satellite e2e suites (16/16 HR, 13/13 sales, 15/15 ticket, 11/11 LOHO).
- Built the central account-manager platform with Express, TypeScript, Drizzle ORM, and PostgreSQL - JWT access tokens plus rotated, hashed refresh tokens revoked on logout and password change, a granular permission catalog (users, roles, leads, tickets, reports, audit logs) enforced by authorize middleware, business modules for accounts, projects, contacts, documents, and payments, Zod validation, Helmet, Redis-backed rate limiting, Pino logging, and Swagger documentation.
- Build the Assis operations dashboard in React, TypeScript, and Vite, covering clients, projects, onboarding, user administration, audit-log exports, and role-based UI access.
- Built an internal Daily Reports operations platform integrating Google Sheets and Zoho Projects, with JWT authentication, Redis caching, admin-triggered syncs with auto-polling, audit logs, a password-protected quality board, and dependency health monitoring for non-technical users.
- Deliver a sales CRM frontend with lead pipelines, bulk assignment, user management, Zoho CRM integration, OIDC (PKCE) login, TanStack Query caching, and Zustand state management across staging and production APIs.
- Deliver an Arabic RTL HR portal (admin and HR roles) covering employees, attendance, departments, offices, and tasks, with lazy-loaded admin modules, role guards, rich-text editing, charts, ExcelJS XLSX/CSV report exports, and real-time updates.
- Ship staging and production releases through multi-stage Docker builds, nginx reverse proxies, and Coolify deployments; all systems pass production builds, lint checks, and dependency audits with zero findings.

Full-Stack Developer | Dec 2025 - May 2026

Springer Capital | United States and Canada | Remote

- Developed React and Next.js interfaces using App Router, Server Components, middleware, and SSR/SSG/ISR rendering patterns.
- Implemented reusable hooks and state management with Context API, Redux, and Zustand; improved rendering and loading through code splitting and image optimization.
- Guided performance work with Lighthouse and Core Web Vitals; delivered with TypeScript, ESLint, Prettier, Git, and CI/CD.

Customer Service Representative | Jul 2024 - Nov 2025

Concentrix | Remote, Egypt

- Resolved high-volume customer issues through problem solving, communication, and issue triage.

Customer Service Representative | Apr 2023 - Mar 2024

Teleperformance | Remote, Egypt

- Handled 80+ technical inquiries daily with approximately 95% customer satisfaction.

PROJECTS

NULL Clothing | Full-Stack E-commerce

Next.js, React, Node.js, TypeScript, PostgreSQL, Prisma

- Built a storefront with product filtering, sorting, pagination, persistent guest carts, account cart merging, checkout order creation, and order history.
- Implemented RESTful APIs with Next.js Route Handlers, bcrypt hashing, JWT sessions in HTTP-only cookies, and Zod validation; modeled users, products, carts, and orders in PostgreSQL.
- Used Prisma transactions to create orders and clear carts atomically, with schema migrations, seed data, and a Docker Compose database environment.

Assis Landing Page and Lead Capture

Next.js, TypeScript, Tailwind CSS, shadcn/ui, React Hook Form, Zod

- Built an Arabic/English (RTL/LTR) landing page with Zod validation on both client and server, submitting company-formation requests through API proxy routes with hosted Moyasar payment checkout.
- Wrote unit and API tests with Vitest and end-to-end tests with Playwright; shipped a multi-stage Docker build (non-root user, container health check) deployed via Coolify.

Internal Ticketing System

React, TypeScript, Vite, TanStack Query, Zod, Radix UI

- Built a REST-connected ticketing frontend with ticket creation, assignment, status changes, messages, attachments, real-time WebSocket notifications, audit logs, and user and department administration.
- Implemented protected routes, role-based views (AuthGuard / RoleRoute guards), session handling, typed API wrappers, response normalization, and SSO sign-in through the central identity provider.

LOHO Operations Web App

React, TypeScript, Vite, Zustand, OAuth 2.0 / OIDC

- Built an internal operations app with dashboard, leads, tickets, users, roles, and permissions modules, route guards for auth and role-based access, and SSO sign-in as a satellite of the account-manager identity provider.

Sales Analytics Dashboard

Next.js, React, TypeScript, Recharts, Tailwind CSS

- Created bar, line, and pie charts with year and threshold filters, mock/API data switching, dark mode, and reusable atomic components.

Flash Tech | Bilingual Storefront

Next.js, TypeScript, next-intl, Zustand, Tailwind CSS, GSAP

- Created Arabic/English product and category pages with a persistent shopping cart, checkout interface, and animated UI.

LOS REYES Tourism Website

Next.js, TypeScript, next-intl, Resend, React Email, Framer Motion

- Built destination routes, trip-planning and inquiry flows, animations, and booking emails via Resend and React Email.

Task Manager REST API

Node.js, Express.js, Prisma, PostgreSQL, JWT, bcrypt, Swagger (OpenAPI)

- Built a layered Express.js REST API (routes, controllers, services, middleware) with JWT authentication, bcrypt hashing, User and Task Prisma models (priorities, completion, cascade delete), and interactive Swagger documentation.

dev-core | Personal Portfolio

Next.js, TypeScript, Tailwind CSS, next-intl, GSAP

- Developed a multilingual portfolio presenting projects, skills, and contact information with animated interactions.

EDUCATION

Bachelor of Science in Information Technology | Egyptian E-Learning University (EELU), Egypt | 2020 - 2024

TRAINING

Full-Stack Development Scholarship | Route, Giza, Egypt | Aug 2024 - Oct 2025 - React, responsive design, performance

LANGUAGES

Arabic (Native) | English (Fluent)
